

PRATIDIPT: A low cost, portable, user friendly indigenous fluorometer for bio-analytical laboratories

Click on image to play DEMO video of working prototype

Measuring Parameter:
Steady State Fluorescence from liquid samples at nanomolar concentrations

Patent Number:
310875
The Patent Office,
Government of India.

Application Areas:

Biochemistry, Molecular & Cell Biological studies, Forensic investigations, Bioprocess & Chemical industries, Medical diagnostics and laboratory detections

PRATIDIPT can serve as a low cost MADE IN INDIA fluorometer for TEACHING LABS in colleges/universities; R and D labs in MSME sector
